SAMPLE - FOR SYSTEM TESTING ONLY

Introduction to Data Literacy: A Collaborative Textbook

FACULTYLINK | KRA I - CRITERION B | SIMULATED TEST EVIDENCE

Faculty: Jason Baroro

Document type: Primary instructional material

Evidence status: FICTIONAL / NOT ISSUED / NOT AUTHENTIC

Accomplishment: Introduction to Data Literacy: A Collaborative Textbook

Authorship: Co-author

Sample year: 2026

Overview

This simulated textbook was prepared for a fictional first-year college learning context.

Purpose: demonstrate an instructional accomplishment and provide OCR-readable sample text for FacultyLink testing.

Learning outcomes

Explain essential concepts through structured instructional activities.

Apply learned concepts in exercises, examples, and reflective tasks.

Content outline

Unit 1: Introduction and objectives.

Unit 2: Guided examples and illustrations.

Unit 3: Practice activities, formative assessment, and answer guidance.

Sample learning activity

Activity: read the case, identify the key concepts, complete a short exercise, and explain the result.

Assessment: a short quiz and performance task aligned to the stated outcomes.

This document is synthetic. Names of institutions, committees, approval actions and signatures are not asserted as real. It must not be used as genuine academic or employment evidence.
